

COOKE CITY WATER DISTRICT

New Service Application

Thank you for your inquiry regarding the procedure for hooking up to our water system. The following information is needed to request new service from the Cooke City Water District.

The property you are applying for a new water service for must already be in the Cooke City Water District. It is best if you send your payment along with the attached form at least 90 days prior to the date you would like your new water service connected. That will give the Board adequate time to make the necessary arrangements to get our portion of the work completed.

After you submit your application for the new service, the Board will review your application for approval at their next regular meeting (Typically the 3rd Tuesday of each month). The cost for connecting to the system is **\$4000.00**, payable to the Cooke City Water District.

This fee includes connecting to the nearest water main and the installation of a curb stop to your property line. The cost also includes providing a water meter to be installed at the property line next to the curb stop or installing the meter in your crawlspace or mechanical room in your home. The cost of installing your service line from the property line to your home (or business) is not included in this cost and it will be your responsibility to hire a contractor and/or equipment at your own expense for that portion of the work.

When your line from the property line to your building has been installed, please notify the District Clerk at 406-224-3891 so that our water operator can be notified that you are ready to turn your water on.

We look forward to providing for your future water needs and if you ever have any questions or concerns, please don't hesitate to let us know.

Thank you, Cooke City Water District
